

2nd Expert Group Meeting on Green Jobs 7-9 June, Stockholm

Green4C: an Erasmus+ project in an emerging field for nature-based innovation and entrepreneurship in Europe

Davide Pettenella

Aynur Mammadova, Colm O'Driscoll, Catie Burlando,

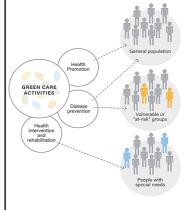

Ilaria Doimo, Giulia Corradini, Anna Biasin

Beyond health benefits. Moving from narrow to broad Green Care concept

Green Care

is an umbrella term for a range of activities that recognise the instinctive connection between nature and human well-being and use natural environments in a conscious, ethical and active way, to address different social needs, i.e. for health and wellbeing, social inclusion, education, and recreation.

3

Use of forests (nature) for Socio-cultural benefits

- Cultural services (art exhibitions, concerts in the forest, theatre performances ...)
- Educational and pedagogic services (kindergarten or outdoor nursery forest schools, nature trails, bird watching, training in the forest, ...)
- Sport services (hunting, hiking, Nordic walking, mountain biking, orienteering, airsoft, archery, use of adventure parks,...)
- Spiritual and religious services (places for meditation and worship, ecological burial, funeral forests)
- Tourism and recreation (walking, visits to special landscapes, sites and natural monuments, wild forest products picking, camping, use of tree hotels, ...)
- Services for social inclusion (activities for the elderly, those with disabilities, prisoners, refugees/displaced people, ...)
- Services for improving wellness and for therapeutic treatments (forest bathing-Shinrin-Yoku, forest therapy, pet therapy, ...)

Synergistic (education, tourism, recreation, and art and culture)

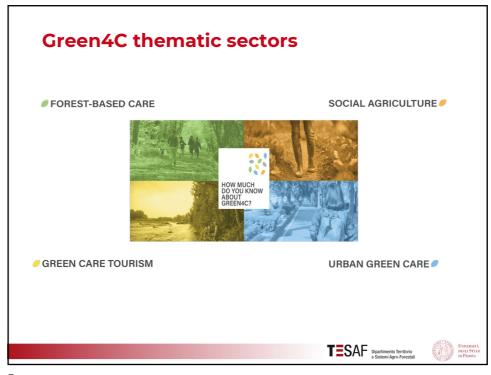

Treatment and Prevention and Promotion of Health and Wellbeing

л

Forest-based Care initiatives as agents of green economy

Entrepreneurship in Green Care refers to processes and outcomes of innovative value creation and business models that harness health and well-being benefits of nature to deliver social, economic and environmental values.

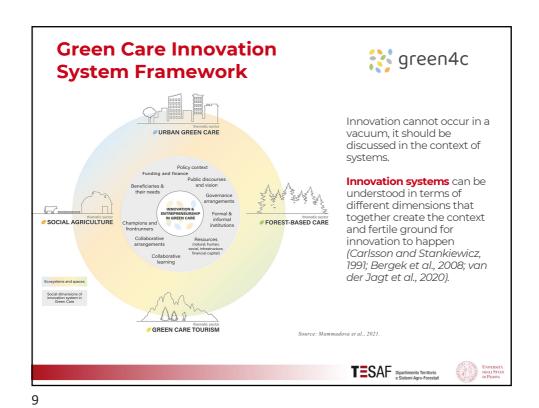

- New entrepreneurship opportunities, innovative professions and green jobs
- Bringing back feminist agency and care ethics to the decision-making about and management of forests (nature) and women empowerment
- **Hybrid organisations** (lack legal clarity, combine profit with purpose, operate across sectors, and in areas where policies and markets have failed, have diverse organizational structures)

Role of funding and finance. Challenges

The challenges related investments in nature and forest sector:

- Unclear return on investments
- High risk
- Long time-frames
- Difficulty to evaluate non-monetary values, etc.

+

The challenges of funding in health and social care sector:

- · Lack of attention on mental and social well-being as part of public health
- Difficulty to monetize avoided costs
- Openness by the healthcare sector to experiment with and integrate nature

The challenges of a start-up activity or projects:

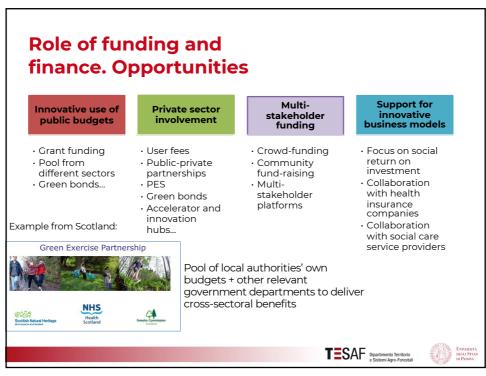

- Sound business models with economic sustainability and continuous revenue streams
- Heavy reliance on public grants and programme funds
- Difficulty to engage in as full-time job
- High-interest bank loans

Some of the outcomes of the project

Green4C Summer School: specialisation in Green Care entrepreneurship

Would you like to learn more about the benefits of nature on health, wellbeing, and social inclusion? Are you interested in gaining knowledge and skills to start your own Green Care initiative?

The **Green4C Summer School: specialisation in Green Care entrepreneurship** is an exclusive and unique opportunity to gain knowledge and entrepreneurial skills in <u>Green Care</u>. For the first time, top European experts in Green Care will come together to share knowledge and best practices related to this sector. **Only participants selected through the Business Innovation Challenge (BIC)** will be able to access the Summer School. Learn more on the <u>BIC</u> and how to participate at the dedicated page.

The Summer School will take place from the 15th of June to the 8th of July 2022, both online and in presence. The first week will be online, while in the remaining three will be hosted at the University of Padova (Italy), specifically at the Agripolis Campus.
